46 WEEKS

SHEARD PACKAGING

5,300 sqm of new covered storage and operational space was delivered within a live 24/7 facility, overcoming challenging ground conditions and potential flood risk. Works were carefully phased and fully integrated with existing structures and machinery, improving operational efficiency and resilience.

🏠 5.5M 📅 78 WEEKS

MACS TRUCKS

Pre-construction work is underway for a new commercial facility in Yorkshire, on a complex site with steep levels, overhead powerlines, and nearby residences. Our team is carrying out risk assessments, surveys, planning approvals, and coordinating with council, highways, environmental and statutory authorities to ensure the project moves seamlessly from design to build.

🏠 £450K 📅 23 WEEKS

CLECKHEATON SPORTS CLUB

The club's changing rooms and facilities were extended and refurbished within a live sports environment. Works integrated structural, roofing, drainage and M&E upgrades, delivering spaces compliant with RFU and ECB standards.

🏠 £240K 📅 50 WEEKS

REDS 10 DRIFFIELD

Multiple works were completed within a live manufacturing facility, including new concrete slabs and foundations for permanent and temporary structures. Careful planning and collaboration with the client allowed works to progress safely while production continued.

🏠 £380K 📅 13 WEEKS

BUY IT DIRECT

An existing temporary structure was transformed into a permanent facility with a drop-off point, security staff area and turnstiles. Works were carefully phased to maintain uninterrupted operations.

56 WEEKS

STANSFIELD MILL

This challenging split-level site project delivered 21 apartments with piled and reinforced foundations supporting a transfer structure at lower ground level. Upper floors used timber SIP frames with Yorkshire stone cladding, combining modern methods with traditional finishes.
